

Engineering Outreach

Launch Girls Saturday Program

Outreach participants enjoy fun, experiential science, technology, engineering and mathematics (STEM) activities.

The Engineering Outreach Office is excited to continue our Launch program series with the Dundas Street Public School! Our very first Saturday program will welcome female students currently in Grades 3-5.

Science & Engineering

This hands-on science and engineering program aims to inspire confidence in problem-solving strategies, teamwork, and a range of STEM-based topics (science technology engineering and math). Our instructors and mentors are women studying science and engineering who are excited to share their enthusiasm for their program of study!

Each Saturday session includes fun, discovery-based science and engineering activities. You can expect activities similar to our other programs, for example, participants may build roller coasters and rockets, explore coding, and design hydraulic arms.

Please note the program is intended for female students and those who identify as female to explore possibilities in STEM. We welcome participants of all genders.

Program Details

Time: **1:00 PM to 4:00 PM**

Ages: **For students who are currently in grades 3 through 5.**

Location: **Dundas Street Public School**, 935 Dundas Street East
